I will be an asset to the company and the team with my various language abilities as well as my work experiences around the world. Having recently completed a coding bootcamp, I am eager to utilize and further expand my knowledge in front-end development, as well as continuously work toward capabilities of a full stack developer.

For working opportunities in South Korea, I was previously on an E7-1 work visa and currently on a D10 job seeking visa, so will be eligible to apply for the E7-1 work visa again with proper application documents.

## PROJECTS & EXPERIENCE

---

**React project** *pending* August 2022

- Solo and group projects using React and Node.js currently in progress

**ROOM-EZ** *JavaScript, PHP, MySQL, AJAX, API, MVC framework* July 2022

- Led as scrum master for one week during a 4-week, 7-member team project, creating a short-term rental leasing service based in South Korea
- Main responsibilities included reviewing KakaoMap documentation to display map features, by sending AJAX request to KakaoMap API using map coordinates generated by zip codes via a separate API

**Weather Forecast API** *JavaScript, AJAX, API, JSON* June 2022

- Search engine system displaying a selected city's weather forecast and details
- Improved from the basic version to an upgraded version which includes an auto-complete feature, that displays names of cities from around the world as user types in the search bar

**Chat Messenger** *HTML, CSS, PHP, SQL* May 2022

- By storing data using the local PHP database, users can send and display chat messages
- Explored the organization of multi-table database to extend the app functions to include account creation and log-in

**talking with tiff** *HTML, CSS* January 2022

- Product landing page for advertising an English language tutoring service

**Gamedex** Global Services & Operations | *Seongnam-si, South Korea* 2020 ~ 2022
